

Referencing Trust Guidelines using the Vancouver style

When referencing using the Vancouver style you need to cite in the main body of your text and produce a reference list at the end of your work.

The citations in your text should be numbered sequentially throughout the text (i.e. 1, 2, 3...). either in brackets or in superscript at the end of the sentence.

The reference list should be at the end of the document arranged in one numerical sequence.

A reference must be treated as a sentence, beginning with a capital letter, and ending with a full stop
